

# Which vaccine will protect me against COVID-19?

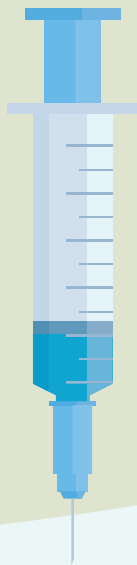

## All of them!

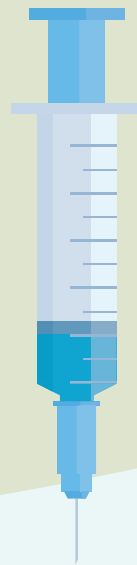

**Moderna**  
2 shots,  
28 days apart

**Pfizer-BioNTech**  
2 shots,  
21 days apart

**Johnson & Johnson's Janssen**  
1 shot

All three vaccines are shown to be greatly effective against COVID-19 and they can all protect you from getting seriously ill.

So any of the three shots will protect you more than waiting for a certain version.

## Did you know?

All three vaccines are highly effective at protecting people against COVID-19 infection. Plus, all three are even **more** effective at preventing serious illness and death. Stopping the spread means stopping dangerous virus mutations.
